

STATPRO SEVEN - OUR NEW WEB-BASED PORTFOLIO ANALYTICS PLATFORM

Experience the latest in middle office operations with a production system that incorporates performance measurement, attribution, risk management, GIPS reporting and compliance reporting. StatPro Seven enables asset managers of any size, with widely varying investment strategies access to accurate, precise and reliable data in order to run business-critical processes and meet today's demanding regulatory requirements.

A New Approach to Middle Office Operations For Asset Managers of All Sizes and Analytic Requirements

StatPro has pioneered a new approach to achieving middle office efficiencies. Until now bringing performance measurement, attribution, risk, compliance and reporting capabilities into a firm often meant making separate purchasing decisions for each function. This resulted in an increase to overall costs; segregated, time consuming installations; and complex integration in the production environment. StatPro Seven provides a one-stop shop for performance, attribution risk management, GIPS compliance and reporting, to enable a streamlined work-flow process.

Reduce Potential Data Errors

StatPro Seven enables asset managers to standardize performance calculations and analysis as well as reduce the potential risk of data inaccuracies by offering one application which links directly to your firm's data source of record. As a provider of both analytics and data, StatPro understands the complexities of managing multiple sources of data. As a client of Statpro you can leverage our data integration experience and take advantage of the latest in data extraction, transformation and loading technologies.

STATPRO SEVEN - **OUR NEW WEB-BASED PORTFOLIO ANALYTICS PLATFORM**

Improve Cost-Efficiency, Free IT Resources and Reduce implementation Time

According to our clients, up to 60% of the cost of running a traditional performance and attribution service can reside in the IT infrastructure and data management required to maintain these systems. StatPro Seven is fully hosted which enables you to drive down your total cost of ownership, free up your IT resources and accelerate your time to deployment. Our world-class hosting infrastructure has achieved industry recognized standards including ISO27001 and SAS70 for information security management. We invest heavily in our IT infrastructure to ensure that we have best in class technology to support our products and client projects. What this means is that you can reduce your IT footprint, accelerate your time to deployment and have a trusted, secure platform to run your mission critical activities.

Firm Type	Benefits
Custodians	Precision, efficiency and flexibility to meet the reporting needs of a diverse group of clients.
Hedge Funds	Able to accommodate virtually any asset type and investment style, Hedge Funds can analyze portfolios in the exact manner they are run.
Large Asset Managers & Small Asset Managers	Streamlined workflow allows more time for portfolio analysis and interpretation rather than focusing on software and data.
Pension Funds, Foundations and Endowment	Single hosted platform with centralized reporting capabilities creates efficiencies and allows for greater transparency at the firm and portfolios level.

StatPro Does It Better

The bottom line is that your business matters to us; StatPro treats each client relationship with care and attention regardless of size. Ensuring the success of **your** middle office is **our** business. As such we staff our client services team with certified consultants, talented individuals with direct experience working in performance measurement and a passion for the industry. We understand the criticality of your needs and are organized to exceed your expectations. As your partner, we will empower your team with 24/5 customer service, 24/7/365 IT support and an industry leading Service Level Agreement. Not only do we provide you with sophisticated analysis and an innovative approach to your middle office operations, but exceptional service at every step along the way: from proof of concept to deployment and after.
